SUMMARY

Product Designer with 5 years of experience building B2B SaaS products from 0 to 1, including 4 years as the founding designer of a security and compliance platform for banks. Owning the end-to-end product design process, from problem discovery and UX definition to visual design, design systems and implementation. Combining strong product design thinking with hands-on frontend development experience in React (TypeScript) and Tailwind.

EXPERIENCE

Founding Product Designer (part-time) — Arlt-labs, Berlin — Nov 2024 – Present

- Lead end-to-end design of BetterLife, a modular health habit tracker built in Flutter for iOS, Android and web.
- Define product direction, UX and brand together with the developer-founder; design mobile-first for one cross-platform codebase.
- Introduced AI-assisted workflows (Figma Make and Claude) that cut design iteration and handoff time.

Founding Product Designer — Sec2do GmbH / Secobo GmbH, Berlin — Nov 2021 – Feb 2026

- Designed a cybersecurity and compliance web platform for banks end to end, turning security standards like ISO 27001 and internal policies into a simple checklist that compliance officers configure and implementation teams track to completion.
- Built the design system from scratch, used by the dev team and across the product, website and marketing assets.
- Collaborated with development teams in Agile sprints, managing design handoffs and QA.
- Created the brand identity and designed and maintained the marketing website in Webflow.

UI/UX Designer — 321 Agencia Digital, Bogotá — Jun 2021 – Feb 2022

- Designed high-fidelity prototypes for landing pages and e-commerce sites for 50+ clients, from briefing to handoff.
- Owned complete client communication: gathered requirements, presented designs and balanced client input with design best practices, backing up important decisions when needed.

SKILLS

Product design: end-to-end UX, user flows, wireframing, prototyping, usability testing, responsive and mobile-first design (iOS, Android, web)

Design systems: component libraries, design tokens, Figma variables, documentation, brand identity

Front-end: HTML, CSS, JavaScript, TypeScript, React, Tailwind CSS, shadcn/ui, Storybook, Node.js, Express, MongoDB, Git

Tools: Figma, Figma Make, Webflow, Jira, Miro, Zeplin, LottieFiles, Adobe Creative Suite

Ways of working: Agile, close collaboration with engineers, AI-assisted design workflows

EDUCATION

Web Development Bootcamp — Ironhack, Berlin — Jul – Oct 2026

JavaScript, React, Node.js, Express, MongoDB

UI/UX Design Bootcamp — Coderhouse (online) — Nov 2020 – Feb 2021

Top 10% of graduates for “Tullave”, an app concept to improve Bogotá’s public transport experience

Bachelor of Arts in Design — Nuova Accademia di Belle Arti (NABA), Milan — 2016 – 2020

Design thinking, graphic communication, 2D and 3D modelling (CAD), photorealistic rendering.
